Field of activity
IT / Telecommunications

Department

Tasks

Lisbon Digital Tech Hub

At the beginning of May, Mercedes-Benz opened the world's first Digital Delivery Hub in the Portuguese capital. Lisbon is currently becoming the "place to be" in the digital world. The world's most important tech-conference, the Web Summit, has been held in Lisbon since last year, for example. Mercedes-Benz is involved as a main sponsor and with numerous well-regarded speakers. The Portuguese capital is a very popular place for "digital natives" to live and work and the scenario is perfect for the new Digital Delivery Hub of Mercedes-Benz. The national government and city council also plan to use this momentum to develop Lisbon into the next digital hotspot. The Portuguese authorities very actively assisted the founding phase of the new centre with minimal bureaucracy.

Until transfer you will be employed by our Portuguese company "Mercedes-Benz Portugal".

Daimler is one of the biggest car makers of the world. It owns Mercedes-Benz and Smart for instance but also other companies as MyTaxi and Car2Go.

Mercedes-Benz is opening a Digital Delivery Hub in Lisbon. The hub will be responsible to create digital marketing products and platforms worldwide.

The auto industry is living an exciting transformation period, from the electric car to the connect car and autonomous driving, there couldn't be a better time to work in this industry.

We are currently looking to hire senior and junior developers and designers in different areas.

Front End developer - JavaScript

You are a talented JavaScript developer that wants to use your skills in a fast-paced innovative team. This is your profile:

- As a professional in object-oriented JavaScript programming you are well versed in the development of responsive user interfaces and apply your knowledge in challenging projects (web and mobile)
- You support our development teams with your practical experience in handling JavaScript libraries and frameworks like AngularJS, jQuery and CSS Precompiles (SASS, LESS) as well as relevant development tools (Closure-Compiler, Grunt, Yeoman, Bower, Karma, SVN, NodeJS, NPM, Git).
- You are familiar with handling frontend web technologies like HTML5 and CSS3, have already acquired experience in the use of Bootstrap or Foundation5.
- In your new job you benefit from your know-how in testing, i.a. with frameworks like Jasmine, Mocha or QUnit as well as Protractor.
