05.05.2017

Field of activity

IT / Telecommunications

Department

Tasks

Lisbon Digital Tech Hub

At the beginning of May, Mercedes-Benz opened the world's first Digital Delivery Hub in the Portuguese capital. Lisbon is currently becoming the "place to be" in the digital world. The world's most important tech-conference, the Web Summit, has been held in Lisbon since last year, for example. Mercedes-Benz is involved as a main sponsor and with numerous well-regarded speakers. The Portuguese capital is a very popular place for "digital natives" to live and work and the scenario is perfect for the new Digital Delivery Hub of Mercedes-Benz. The national government and city council also plan to use this momentum to develop Lisbon into the next digital hotspot. The Portuguese authorities very actively assisted the founding phase of the new centre with minimal bureaucracy.

Until transfer you will be employed by our Portuguese company "Mercedes-Benz Portugal".

Daimler is one of the biggest car makers of the world. It owns Mercedes-Benz and Smart for instance but also other companies as MyTaxi and Car2Go.

Mercedes-Benz is opening a Digital Delivery Hub in Lisbon. The hub will be responsible to create digital marketing products and platforms worldwide.

The auto industry is living an exciting transformation period, from the electric car to the connect car and autonomous driving, there couldn't be a better time to work in this industry.

We are currently looking to hire senior and junior developers and designers in different areas.

Cloud Solution Architect

As a cloud solution architect you will be working on multiple projects developing solutions for each project. This is your profile:

- As cloud architect you create technical design recommendations for the development and integration of

new software and system technologies based on your development experience.

- You support the development of a platform on cloud technology and benefit from your experience with AWS, Bluemix & Azure or Cloud Foundry.

- Based on your know-how in automatization approaches, continuous delivery, visualization of concepts via UML and deployment pipelines, you complement or team efficiently.

- You bring in your experience with architectures of service-oriented solutions and the usage of web solutions – even the practical development of short-time solutions for immediate demand are no problem.
