Tasks

Lisbon Digital Tech Hub

At the beginning of May, Mercedes-Benz opened the world's first Digital Delivery Hub in the Portuguese capital. Lisbon is currently becoming the "place to be" in the digital world. The world's most important tech-conference, the Web Summit, has been held in Lisbon since last year, for example. Mercedes-Benz is involved as a main sponsor and with numerous well-regarded speakers. The Portuguese capital is a very popular place for "digital natives" to live and work and the scenario is perfect for the new Digital Delivery Hub of Mercedes-Benz. The national government and city council also plan to use this momentum to develop Lisbon into the next digital hotspot. The Portuguese authorities very actively assisted the founding phase of the new centre with minimal bureaucracy.

Until transfer you will be employed by our Portuguese company "Mercedes-Benz Portugal".

Daimler is one of the biggest car makers of the world. It owns Mercedes-Benz and Smart for instance but also other companies as MyTaxi and Car2Go.

Mercedes-Benz is opening a Digital Delivery Hub in Lisbon. The hub will be responsible to create digital marketing products and platforms worldwide.

The auto industry is living an exciting transformation period, from the electric car to the connect car and autonomous driving, there couldn't be a better time to work in this industry.

We are currently looking to hire senior and junior developers and designers in different areas.

Information Architect

We are looking for experienced Information Architect to help in building the data strategy and governance for our information architecture. This is your profile:

- As information architect, you always have the mission and vision of projects in mind and you are used to

balancing the different requirements of stakeholders and their target groups.

- You develop and design contents and functions in terms of use cases, concepts (information vision) and you shape business layers as well as downstream systems; therefore, you translate technical requirements into data models and information architectures.

- Your input defines how information and user get together and it defines the organization of contents, navigation, labeling and search approaches. Your strength lies in consistent processing of information for reporting, analytics and real-time data for closed loop approaches – close collaboration with analytics functions and other relevant departments is essential prerequisite.

- You support the whole development process initially and in ongoing enhancements, and you ensure the precise implementation of concepts. You benefit from your fast perception, communication strength and team oriented way of working.

- In your function as our new „information evangelist“ you represent the interests of Daimler with your excellent knowledge about data modelling, as well as respective approaches, tools and methods (e.g. semantic web, ...).

- Your open mind for new and innovative topics, your curiosity and willingness to learn enthuses everyone about the versatility of data modelling.
