**05.05.2017**

Field of activity  
**IT / Telecommunications**

Department

### Tasks

#### Lisbon Digital Tech Hub

At the beginning of May, Mercedes-Benz opened the world's first Digital Delivery Hub in the Portuguese capital. Lisbon is currently becoming the "place to be" in the digital world. The world's most important tech-conference, the Web Summit, has been held in Lisbon since last year, for example. Mercedes-Benz is involved as a main sponsor and with numerous well-regarded speakers. The Portuguese capital is a very popular place for "digital natives" to live and work and the scenario is perfect for the new Digital Delivery Hub of Mercedes-Benz. The national government and city council also plan to use this momentum to develop Lisbon into the next digital hotspot. The Portuguese authorities very actively assisted the founding phase of the new centre with minimal bureaucracy.

Until transfer you will be employed by our Portuguese company "Mercedes-Benz Portugal".

Daimler is one of the biggest car makers of the world. It owns Mercedes-Benz and Smart for instance but also other companies as MyTaxi and Car2Go.

Mercedes-Benz is opening a Digital Delivery Hub in Lisbon. The hub will be responsible to create digital marketing products and platforms worldwide.

The auto industry is living an exciting transformation period, from the electric car to the connect car and autonomous driving, there couldn't be a better time to work in this industry.

We are currently looking to hire senior and junior developers and designers in different areas.

**Software Engineer - Java developer**

As a Java developer you will join an ambitious team that will build the next generation of Daimler products and platforms. This is your profile:

- With your profound knowledge in Java as well as your knowledge in handling the spring framework and web services you develop.
- With the help of highly performant equipment and current open source frameworks you work with latest methods (e.g. Scrum, TDD) and create complex web applications in Java in your development team.
- In the conceptualization of solutions and the creation of software- and system architecture, you benefit from your analytical strength as well as your knowledge about design patterns.
- You already acquired knowledge in handling databases and persistent systems – preferably you have already gained experience in the areas HTML, CSS, JavaScript and JS-frameworks.
- Your team orientation, personal initiative and your sense of responsibility are a perfect match for our actively lived corporate values.
